PROFILE

Passionate and detail-oriented Full Stack Developer and IT Administrator, currently pursuing a Master's in IT Security. Strong background in building secure, scalable web applications (React, Node.js) and managing robust IT infrastructures (Windows/Linux, Virtualization). Proven ability to reduce system downtime and provide effective 1st/2nd level support. Eager to contribute both development and IT operations skills to a challenging role.

WORK EXPERIENCE

Full Stack Developer   Jan 2024 – Present
Freelancer - Passau, Germany

• Designed and developed fully responsive web applications using React, Node.js, Express, and MongoDB for various clients.

• Managed the end-to-end software development lifecycle, from requirements gathering to deployment and maintenance.

• Built and integrated secure RESTful APIs to support frontend functionality and third-party integrations.

• Collaborated with clients and designers to translate business needs into technical solutions, using Git/GitHub for version control.

IT Support (2nd Level)   Jan 2023 – Jan 2024
Sarwari Paper Co - Kabul, Afghanistan

• Provided 1st and 2nd level technical support for Windows servers, workstations, printers, and networking equipment.

• Improved system reliability, contributing to a **30% reduction in downtime** through proactive issue resolution.

• Implemented system security protocols, including antivirus management, user access controls, and patch updates.

• Assisted with migrating local systems to a cloud-based platform to improve accessibility and reduce hardware costs.

• Created internal documentation and trained employees on new IT policies and software usage.
